

Speech-enable TPP SystemOne with Dragon Medical One.

Making it faster and easier for clinicians to update the electronic patient record (EPR).

Nuance partners with TPP to enable more complete, accurate, and timely documentation within the EPR – improving patient care and increasing staff satisfaction. Our AI-powered speech recognition solution Dragon Medical One seamlessly works with the SystemOne EPR and delivers 99% accuracy from the start with no voice profile training required.

Improve quality of care and drive efficiency

Dragon Medical One is a cloud-based solution, providing doctors, nurses and allied health professionals with a single voice profile that can be accessed on different devices in different locations. Individual user speech profiles, including custom vocabularies and autotext templates, are sharable across devices and apps. With Dragon Medical One, clinicians can document directly within the EPR or generate voice-driven content outside of the patient record.

Use voice commands to navigate TPP SystemOne EPR more quickly and easily:

- Dictate at the cursor within SystemOne modules
- Dictate into SystemOne with a mobile device (an alternative to using a tethered microphone) using the Nuance PowerMic mobile application which is supported on iOS and Android platforms

Maximising the EPR value

Clinicians can use Dragon's conversational user interface to create effective and comprehensive clinical documentation without sacrificing time with patients. Nuance solutions drive successful adoption and maximise the value hospitals and clinics receive from their EPR.

WHY TPP CLIENTS CHOOSE NUANCE

- **AI-powered** speech recognition
 - **Clinical approach** and content backed by 25 years of expertise
 - **Mobile effectiveness**
 - **Improved costs**, better outcomes, and better experience
-

"I have found the Dragon Medical One software extremely helpful, I find my notes are much more detailed and I write so much more, it is saving me time every day and I am now reducing the amount of time I spend in my own time catching up on my documentation."

- Kay Imbirski, Community nurse team leader, Provide
-

Dragon Medical One in SystemOne offers

- **Cloud-based and secure speech**-enabled documentation for clinicians on the go
- **Full support for PowerMic Mobile** (Nuance mobile app, supported by iOS and Android platforms) hosted on Microsoft Azure in the United Kingdom, a UK GDPR compliant and an ISO 27001 certified hosting infrastructure
- **Speech-to-text** capabilities outside the TPP EPR, such as in Microsoft® Office

“I have found the Dragon Medical One software extremely easy and helpful to use. I found that my notes have much more detail and more accuracy when documenting. This also reduces the time I spend doing my SystemOne notes. I also use the software to help support me with writing essays due to currently doing my district nurse specialist training. It is easy to use and navigate, and I used Dragon Medical One to write this feedback. I found it really helpful and glad PROVIDE has introduced this.”

— Emma Staples, District nurse student, Provide
