Analytics updated daily to improve and monitor clinical and financial performance

Nuance Performance Analytics

Quality care continues to drive accurate reimbursement. Today hospitals need to know where they stand to be able to quickly identify and correct performance issues to reduce readmissions and hospital-acquired conditions, manage costly physician practices, and improve value-based purchasing performance. However, data required to create reliable, accurate, and timely reports is often old, incorrect, fragmented, and difficult to pull from multiple systems.

Nuance Performance Analytics helps improve clinical, financial, and patient outcomes by providing data analytics and systems to track, analyze, and benchmark performance. This cloud-based solution incorporates the latest regulatory and reporting rules to provide comprehensive, customizable options to help analyze risks and identify improvement opportunities.

Organizations can compare facilities with other health systems around the country against the national database, which includes all payer inpatient data for multiple states and all Medicare inpatient discharges. Nuance Performance Analytics enables outcomes analysis for numerous areas including physicians' complication rates, patient length of stay, cost per case, and much more. Dashboards and trend reports provide reliable, timely information to help improve overall quality scores and patient safety, reduce readmission rates and hospital-acquired conditions, and prevent associated penalties.

Daily updates to improve outcomes

Nuance Performance Analytics incorporates the latest regulatory and reporting rules to provide comprehensive, customizable options to help analyze risks and identify improvement opportunities.

- **Take action immediately** with data that is updated daily for all criteria– not weekly or monthly.
- **Understand all populations** via a single data source used by all care team members.
- **Identify trends** with a graphical representation of performance opportunities.
- **Minimize maintenance** with a turnkey, web-based solution hosted by Nuance. No uploading, downloading, or database creation is required.

Monitor with customized reporting

Daily trending automatically renders timely and actionable information, every day.

Performance dashboards enable constant monitoring and trend analysis to help assess clinical and financial performance for populations, readmissions, clinical status, physicians and measures including OPPE, PSIs, and HACs. Meet the information needs of executive leadership, medical office staff, surgical services, finance, health information management, and clinical staff while eliminating custom programming and spreadsheets.

Enterprise reporting with role-based access empowers decision makers throughout the organization. Customizable executive dashboards provide daily updates on the metrics that matter most. Create reports that highlight the lines of service that may be at financial risk or those that are doing particularly well, and identify opportunities to create dedicated lines of service by tracking the trends of service utilization and performance.

Customizable physician profiling (OPPE monitoring) allows for summarization of physician statistics for readmission analysis, top DRGs, diagnoses and procedures, clinical case mix and outcomes, and much more.

Robust support resources incorporate the latest regulatory rules, regulations, and reporting requirements.

Leapfrog survey support simplifies data capture to enable survey participation and improve transparency into quality of care and patient engagement and satisfaction.

Today's challenges require new approaches and tools if we are to know what is really occurring in the organization. To learn more about how Nuance Healthcare can help you improve financial performance, raise the quality of care, and increase clinician satisfaction, please contact us at 877-805-5902 or visit nuance.com/healthcare.

Quality measures for near real-time reporting

When used in combination with Nuance Quality Measures, Nuance Performance Analytics reveals even more. With pre-populated performance on core measures updated daily, data flows straight from the core measures to the analytics system, providing a 360-degree view of overall clinical performance and independent licensed providers, with no extra effort.

About Nuance Communications, Inc.
Nuance Communications (NASDAQ: NUAN) is the pioneer and leader in conversational AI innovations that bring intelligence to everyday work and life. The company delivers solutions that understand, analyze, and respond to people—amplifying human intelligence to increase productivity and security. With decades of domain and AI expertise, Nuance works with thousands of organizations globally across healthcare, financial services, telecommunications, government, and retail—to create stronger relationships and better experiences for their customers and workforce.
